

Solid, safe and simple strap cart; These are the guiding principles behind the CCD 401.

3 EYELETS ON THE REEL PLATE

The reel plate has 3 eyelets, which provide visual confirmation of strap level. Those eyelets (holes) also make it easier to pull out the PP strap banded around the coil after the setting.

EASY TO OPERATE

Upright positioning minimizes dispenser damage and operator fatigue. Long foot design stabilizes the body while strapping.

GRAVITY BRAKING SYSTEM

The simple gravity braking system applied to the outer periphery of the reel plate enables stress free braking for efficient strapping operation. The brake prevents excessive discharging of the strap from the coil.

LARGE TOOL BOX

A large tool box provides storage space for many types of large sized battery and pneumatic hand tools available in the market.

DURABLE BODY STRUCTURE

Simple body design ensures durable structure for heavy-duty operation. The solid frame combines the best features of both two-piece and unibody designs.

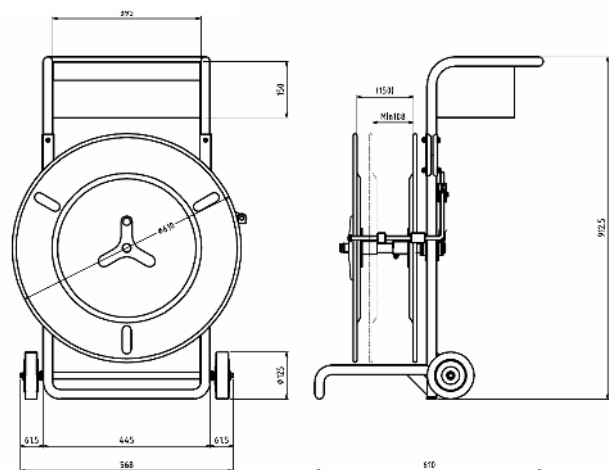

Standard Specifications

Name	Portable Strap Dispenser
Model	CCD401
Dimensions	Frame: L568×D610×H912.5mm Coil plate ED: 610φmm
Loadable strap size	PET/PP Core ID: 406mm Coil width: 118 ~ 160mm
Heavy duty tray	L395xW220xH150mm
Brake system	Gravity braking system
Wheel size	External dim.: 125φmm

Dimensions

Model: CCD401
